VISUAL WORKS

2025 IEEE ICTAS Student Symposium at DUT.

Visual Works was honoured to be part of this exciting event, which brought together students, academics, and global industry experts to explore the power of ICT, engineering, and innovation to shape a better tomorrow.

Our very own Director and Business Coach, Tania Muhlenbeck, took the stage to share real-world entrepreneurial insights, backed by 26 years of hands-on experience building businesses and solving problems with technology.

From AI and automation to IoT in agriculture and the future of work, it was a week of bold ideas, inspiring visions, and future-proof thinking! We are proud to stand alongside DUT in empowering future leaders and creating impactful tech-driven solutions for Africa and beyond.

Huge thank you to IEEE South Africa Computer Chapter and DUT's Faculty of Accounting and Informatics & Faculty of Engineering and the Built Environment for the warm welcome and incredible platform.
